

## Search Immunization History

### Overview

In EMTrack, you can search for and locate a patient's immunization history to verify the make, date, and dosage of previous vaccinations.

### To search a patient's immunization history

1. Log in to EMTrack. The *Dashboard* opens.
2. Click the **Patient** tab. The *Patient* page opens.
3. In the list of forms, click the appropriate vaccination form.
4. In the **Incident Involvement** list, select the incident.
5. For **Ticket**, click **Scan or Search** to enter the patient's information.

**Patient ID**

Incident Involvement

ID #

Ticket

Alternate ID	ID #	Description
	<input type="text"/>	<input type="text"/>
	<input type="button" value="+ Add"/>	

Driver License

6. Enter any additional information.
7. In the *Immunization History* section, click **Search History**. The *Search Immunization History* window opens.
8. If necessary, enter more information about the patient.

**Search Immunization History**

First Name  Middle Name  Last Name

Date Of Birth   Gender

[Show Extended Search](#)

9. Click **Search**. If this is a new patient, the search will not return any information. If this is a returning patient, the search will return information about the patient's previous vaccinations.
10. If the patient has an immunization history, click **Save**. The window closes and a link to this information appears next to the **Search History** button.
11. Continue completing the form.
